Summary

Aspiring Artificial Intelligence and Data Science engineer with a strong academic foundation in artificial intelligence, machine learning, data analytics, and software development. Proficient in Java, Python, SQL, and Git, with hands-on experience in developing academic and personal projects that demonstrate strong analytical thinking, problem-solving, and programming skills. Passionate about leveraging data-driven technologies to design innovative, efficient, and scalable solutions. A quick learner with excellent communication, collaboration, and adaptability skills, eager to contribute to a dynamic organization while continuously enhancing technical expertise and delivering meaningful business value.

Education

Dhanalakshmi Srinivasan University

Nov 2023 – May 2027

Bachelor of Technology in Artificial Intelligence and Data Science (CGPA -7.68/10)

Trichy, Tamil Nadu

Internship

Rinex Technology

Jan 5, 2026 – Mar 4, 2026

Web Development Intern

Bangalore , karnataka

- **Front-End & Back-End Development:** Built and maintained responsive, user-friendly web applications using HTML5, CSS3, JavaScript, and modern front-end frameworks.
- **UI/UX Optimization:** Designed clean user interfaces and improved page navigation, ensuring seamless cross-browser compatibility and mobile responsiveness
- **API Integration:** Integrated RESTful APIs to connect front-end components with back-end services and databases
- **Collaborative Workflow:** Used version control systems (Git/GitHub) to manage code repositories and collaborate effectively on development sprints.

Projects

Student Management System | *Java, Spring Boot, MySQL, HTML, CSS, JavaScript, Bootstrap*

- Developed a web-based Student Management System to manage student records, attendance, and performance.
- Implemented CRUD operations for student registration, profile management, attendance, and marks..
- Designed a responsive admin dashboard for efficient student data management and report generation.
- Integrated Spring Boot with MySQL to provide secure and reliable data storage and retrieval

Customer Churn Prediction using SNN As a Mini projects | *Python, (SNN), Streamlit,Pandas, NumPy, Matplotlib*

- Developed a customer churn prediction system using a Spiking Neural Network (SNN) to classify customers as likely to churn or not.
- Implemented secure user authentication, shopping cart, and order management.
- Integrated REST APIs with MongoDB for efficient data handling.
- Designed a responsive, user-friendly interface with product feedback and ratings.

Smart Helmet for Rider Safety using IoT | *Arduino Uno, Embedded C, GPS, GSM, IR Sensor, Vibration Sensor*

- Developed an IoT-based smart helmet system to enhance rider safety by ensuring helmet usage before vehicle ignition.
- Integrated helmet detection sensors to prevent riding under unsafe conditions.
- Implemented accident detection using sensors and automatically sent the rider's live location to emergency contacts through the GSM and GPS modules.

Technical Skills

Languages: Java, Python,SQL

Developer Tools: Git, GitHub, VS Code,Antigravity

Technologies/Frameworks: Spring Boot, HTML5, CSS3, JavaScript, Bootstrap,Streamilt,Pandas,NumPy
